Career:

1997 – present Diagnostic Laboratories for Inherited Metabolic Disorders, Department of Pediatrics and Inherited Metabolic Disorders, General University Hospital in Prague, Ke Karlovu 2, 128 08 Prague, Czech Republic

Biochemist, I attend to urea cycle disorders, analysis of urinary organic acids and gas chromatographic/mass spectrometric analysis in diagnosis of inherited metabolic disorders. From year 2000, my main interest is mass spectrometry in diagnosis of inherited metabolic disorders and newborn screening of inherited metabolic disorders.
