

MSc, Magdalena Rajska

SPADIA LAB, a.s.

Czech Republic

Magdalena graduated in 2009 at Jagiellonian University, Faculty of Chemistry. Since 2010 she has been engaged in clinical diagnostics at SPADIA LAB. In her work she has focused on technologies such as liquid chromatography, atomic spectrometry and ICP-OES. In 2015 she completed specialization education and gained certification in the field of clinical biochemistry. In 2015 she participated in implementation of LCMS systems into clinical laboratory and since then she has been focused on the development, implementation of methods and optimization of processes at the chromatography and spectrometry department. She has gained her experience in the SPADIA LAB and during trainings at MSACL conferences. Since 2020 she has been working as a laboratory software consultant at STAPRO, still staying in cooperation with SPADIA LAB.
