

**Tor Savidge, Ph.D.**  
**Associate Professor Department**  
**of Pathology & Immunology**  
**Baylor College of Medicine**

**Houston, TX, US**

Dr. Savidge is Associate Professor in the Department of Pathology & Immunology at Baylor College of Medicine and is the Associate Director of the Texas Children's Microbiome Center. His research interests include studying microbial-neuroimmune-diet interactions in the gastrointestinal tract. This work has established new disease susceptibility biomarkers of gastrointestinal disorders, including infectious colitis, inflammatory bowel disease and irritable bowel syndrome, as well as identifying novel host-microbiome signaling mechanisms that are being pioneered as "precision microbial therapeutics".
